PROFESSIONAL SUMMARY

AI-Powered Full-Stack Developer with hands-on experience building AI-enabled web applications, automation workflows, and developer tools. Experienced across React, Node.js, MongoDB, REST APIs, LLM integration, LangChain, LangGraph, RAG, Redis, and Docker. Built and deployed projects involving AI website generation, voice and messaging automation, AI image generation, and an AI-powered developer platform. Strong interest in emerging AI technologies, AI-assisted development, and turning experimental ideas into practical, scalable products.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Tailwind CSS, Vite, Three.js, GSAP, HTML5/CSS3
- **Backend & APIs:** Node.js, Express.js, Flask, REST API Design, JWT, OAuth, RBAC, Zod, Argon2, bcrypt
- **AI & LLM:** Google Gemini API, OpenRouter API, LangChain, LangGraph, RAG, Prompt Engineering, AI-Assisted Development
- **Databases & Infrastructure:** MongoDB, SQLite, Redis, BullMQ, Docker, Nginx
- **Cloud, Deployment & Automation:** Vercel, Git/GitHub, CI/CD, n8n
- **Security & Networking:** RSA, AES, TCP/UDP, Subnetting, Cisco Packet Tracer, VLANs
- **Tools:** Postman, VS Code, Agile Development

EXPERIENCE

Freelance Full-Stack Developer

Nov 2025 – Present

Self-Employed

Sahiwal, Pakistan

- Owned the end-to-end development lifecycle for 4+ production web applications, from requirements gathering and architecture to deployment and maintenance.
- Designed secure REST APIs using JWT authentication, role-based access control (RBAC), Zod for robust data validation, and Argon2/bcrypt for secure password hashing.
- Integrated LLM APIs (Gemini, OpenRouter) into real-world applications, engineering custom retry and back-off handling to maintain 99%+ API success rates despite third-party rate limits.
- Designed scalable MongoDB schemas and optimized query patterns, significantly reducing database retrieval latency and improving overall application performance.
- Managed project scope, milestones, deployment, and feature delivery independently, consistently meeting client deadlines and specifications.

FEATURED PROJECTS

ZS Code — AI-Powered Developer Platform

2026 – Present

React, Node.js, Express, Redis, Docker, LangGraph, LLM APIs

- Building a VS Code-inspired web development platform combining a file explorer, integrated terminal, AI chat, live project preview, and developer-focused workflows.
- Architected backend services for authentication, file management, terminal processes, project management, and AI interactions using a service-oriented approach.
- Integrated LLM-powered developer assistance with streaming responses and structured AI events for interactive coding workflows.
- Implemented Redis-backed session and process infrastructure alongside Docker-based development services.

AI Website Builder

2025 – 2026

React, Vite, Node.js, Express, MongoDB, Redux Toolkit

- Engineered a prompt-driven generation pipeline that converts natural-language instructions into functional, responsive web layouts.
- Built an in-browser live preview and editing workflow with synchronized application state using Redux Toolkit to minimize unnecessary component re-renders.

- Developed account-based credit and quota tracking to securely control AI generation limits and project operations.
- Designed MongoDB schemas for scalable project storage, enabling seamless one-click saving, versioning, and deployment of user-generated sites.

JARVIS — Text & Voice AI Assistant with WhatsApp Automation

2025

Python, Flask, SQLite, Selenium, PyAutoGUI, Web Speech API

- Built a multi-lingual voice and text-based AI assistant using the Web Speech API integrated with a Python/Flask backend.
- Automated WhatsApp communications through Selenium and PyAutoGUI, enabling hands-free execution of messaging and call-related actions.
- Implemented SQLite-based session logging to retain context and track past user commands for consistent interaction recall.

Lumina Studio — AI Image Canvas

2025 – 2026

React, TypeScript, Express.js, ImageKit, Gemini Image API

- Developed an AI-powered image-generation canvas that reliably creates high-fidelity visual assets from natural-language prompts.
- Configured ImageKit-based image optimization and delivery pipelines, heavily reducing media storage overhead and accelerating asset load times.
- Deployed custom Express middleware for strict rate limiting and API protection to maintain platform stability during traffic spikes.

EDUCATION

COMSATS University Islamabad

May 2024 – Jul 2028 (Expected)

B.S. Computer Science

Sahiwal, Pakistan

- **CGPA:** 3.73/4.0
- **Relevant Coursework:** Data Structures, Analysis of Algorithms, Object-Oriented Programming, Database Systems, Computer Networks, Software Engineering, Information Security.
- **Academic Achievement:** 4.0/4.0 GPA in 3rd semester, including top marks in Data Structures and Object-Oriented Programming.

CERTIFICATIONS

- **Microsoft Azure AI Essentials: Workloads and Machine Learning on Azure** — LinkedIn Learning (2026)
- **Next.js App Router Fundamentals** — Vercel
- **Python Core Programming** — Kaggle
