GitHub:
github.com/your-username

Portfolio:
<https://za-portfolio.vercel.app/>

CORE STACK

- HTML5 / CSS3
- Tailwind CSS
- JavaScript ES6+
- React.js
- Node.js
- Express.js
- MongoDB
- REST APIs
- JWT Auth
- Git & GitHub
- Flutter / Dart
- Firebase
- Vercel
- Vite

ROLE TARGETS

- Junior MERN Developer
- Full-Stack Developer Intern
- React Developer Intern
- Backend Developer Intern
- Web Developer Trainee

SOFT STRENGTHS

- Problem-solving mindset
- Clean code habits
- Fast learner
- Team communication

MUHAMMAD ZAEEM AHMAD

MERN Stack Developer | Computer Science Student

Recruiter-focused junior full-stack developer profile built around scalable web applications, secure backend engineering, clean UI implementation, and production-ready learning mindset.

PROFESSIONAL SUMMARY

MERN Stack Developer and BS Computer Science student at COMSATS University Islamabad, Sahiwal Campus, with hands-on focus on secure backend systems, scalable web applications, REST API development, authentication flows, and responsive frontend interfaces. Able to convert requirements into structured application features, write maintainable JavaScript code, design MongoDB data models, and collaborate through Git-based workflows. Seeking internship or junior developer opportunities where strong learning speed, backend security awareness, and full-stack project execution can create measurable value.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3, responsive layouts, component-based UI, forms, state handling, API integration

Backend: Node.js, Express.js, RESTful APIs, routing, middleware, validation, server-side architecture, error handling

Database: MongoDB, Mongoose, schema design, CRUD operations, query optimization basics, data relationships

Security: JWT authentication, password hashing concepts, protected routes, role-based access basics, input validation

Tools: Git, GitHub, VS Code, npm, Postman, browser DevTools, deployment workflow basics

Programming Foundation: Java, object-oriented programming, arrays, loops, functions, problem-solving fundamentals

SELECTED PROJECT EXPERIENCE

Portfolio Website with Interactive Tabs | [HTML](#), [CSS](#), [JavaScript](#)

- Built a multi-section portfolio interface with Skills, Experience, and Education tabs for structured personal branding.
- Implemented content visibility toggling so each section opens cleanly without breaking the existing layout or styling.
- Focused on responsive presentation, recruiter-friendly information architecture, and maintainable frontend structure.

Secure MERN Authentication System | [MongoDB](#), [Express.js](#), [React.js](#), [Node.js](#), [JWT](#)

- Designed a full-stack authentication flow including user registration, login, protected routes, and token-based access.
- Applied backend security concepts including password hashing, request validation, route protection, and error handling.
- Structured API routes and database models to support scalable feature growth and cleaner maintenance.

REST API Backend for Web Applications | [Node.js](#), [Express.js](#), [MongoDB](#), [Postman](#)

- Created CRUD API endpoints for application data management using Express routing and MongoDB persistence.
- Tested API behavior with Postman, handled common edge cases, and returned consistent JSON responses.
- Organized controller, model, and route logic to keep backend code readable and industry aligned.

MUHAMMAD ZAEEM AHMAD

PROJECT DETAIL :

MERN Stack Application Architecture | React, Node, Express, MongoDB

- Understands separation of concerns across client, server, database, routes, controllers, and reusable components.
- Comfortable building feature flows from UI input to backend validation, database storage, and API response handling.
- Can document application endpoints, test request/response cycles, and debug integration issues across the stack.

Frontend Engineering Practice | React, JavaScript, CSS

- Creates clean page sections, reusable UI patterns, responsive spacing, and user-friendly navigation flows.
- Works carefully with existing CSS/layout when adding new features so the visual structure remains stable.
- Builds recruiter-facing portfolio pages that communicate skills, education, and project work clearly.

Backend Security & API Practice | JWT, Express Middleware, MongoDB

- Applies authentication and authorization basics include token issuance, protected endpoints, and user-session logic.
- Uses validation and structured error responses to reduce unstable behavior and improve API reliability.
- Prioritizes secure backend patterns while continuing to deepen knowledge of production security standards.

EDUCATION

BS Computer Science - COMSATS University Islamabad, Sahiwal Campus

(Present – 2028)

Relevant focus: programming fundamentals, object-oriented programming, databases, web development, problem solving, software engineering practice.

Intermediate in Fsc-medical – Govt. Postgraduate college, Sahiwal

(2021-2023)

ACADEMIC & PRACTICAL FOUNDATION

- Strong programming fundamentals with Java practice: methods, overloading, arrays, classes, loops, and conditions.
- Experience solving structured coding problems and translating requirements into working logic.
- Understanding of database-backed web applications and how frontend actions connect with backend services.
- Comfortable improving projects iteratively without unnecessary restructuring of existing code.

PROFESSIONAL VALUE PROPOSITION

- Can support development teams by building frontend sections, API routes, database models, and feature-level fixes.
- Learns quickly, asks practical questions, and focuses on clean implementation rather than only theory.
- Prepared to contribute to real projects involving React interfaces, Express APIs, MongoDB data handling, and Git workflows.

ATS KEYWORDS

- MERN Stack
- Full-Stack Development
- React.js
- Node.js
- Express.js
- MongoDB
- Mongoose
- REST API
- JWT Authentication
- Backend Security
- Responsive Design
- JavaScript
- GitHub
- Postman
- CRUD
- API Integration

AVAILABILITY

- Internship roles
- Junior developer roles
- Remote / on-site / hybrid
- Project collaboration
- Entry-level web roles
